

Part3

FRONTEND DEVELOPMENT

WHAT **is** JSX?

Part3

- JSX is a JavaScript Extension Syntax used in React to easily write HTML and JavaScript together.
- JSX stands for JavaScript XML.
- JSX allows us to write HTML in React.
- JSX makes it easier to write and add HTML in React.

Part3

JSX supports HTML like attributes. All HTML tags and its attributes are supported. Attributes has to be specified using camelCase convention instead of normal HTML attribute name

Example:

```
const jsx = <h1>This is JSX</h1>
```

Part3

Js Vs JSX

JS is simply a scripting language, adding functionality into your website. **JSX** is an addition to the JavaScript syntax which is a mixture of both **HTML** and **JavaScript**. Both **JS** and **JSX** are interchangeable but **JSX** makes the code easier to understand for users.

We *daily* add this kind of of posts
so,if you wanna to see more *content*
relate to *code* ,then follow
